

## Squadron – Electrical Engineer

### Electrical Engineer

We at Squadron believe that a community of experts with different skills is needed to take business to the next level in this digital era. All members, as we call ourselves, are specialists in their field. Our best-placed experts tackle their challenges together with our customers. On a project basis, with a clear scope and according to our unique approach with maximum impact.

**This is how we make a real impact and realize our dream of “Making the golden age of technology happen”.**

Now, we are expanding our remote team working from our offices in Skopje and looking for experienced **Electrical Engineers**.

#### Description:

As an electrical engineer **EPLAN designer**, you are responsible for compiling the project requirements by studying customer specifications and applying general machine guidelines. You conduct the study in EPLAN and create the necessary parts lists, cable lists, labels, and other relevant documentation.

You gather supplier documentation and provide electrical documentation for the assigned project. You also provide technical support to the project managers during project meetings with the customer.

You work from our location in Skopje with many colleagues within the group and with a team of experts, and you also will work closely with a remote team of experts in Belgium with whom you can spar and share knowledge anytime.

You enjoy following up on the realization of the assigned projects in the workshop to detect possible improvements. This means you are closely involved in the project and actively seek opportunities to optimize the process.

#### Your competences

- Bachelor's degree in electromechanics or electrical engineering, master's degree in electromechanics or equivalent through experience
- Sociable and communicative
- Team player and eager to learn
- Knowledge of EPLAN
- Good knowledge of Microsoft Office
- Fluent in English
- Strong analytical, problem-solving, and conceptual skills and a willingness to travel to customer offices in Belgium.
- Ability to adapt and apply rapidly changing technology to in-house business needs.
- A flat structure that creates space for ownership, initiative, and the development of new ideas - freedom to carry out your project independently means short communication lines and a personal approach!
- Competitive and transparent salary with an individual performance evaluation policy as part of our MASTER-SHAPE program.
- Private health insurance starting from Day One as part of our company policy – PEOPLE FIRST.

- Professional and personal growth with all the valuable resources for your future career development - technical and soft-skills educational training plan opportunities, educational vouchers, and bonuses compensations - included!
  - Flexible & hybrid working hours: from our great offices, that follow the latest technology trends and possibilities for remote- flexible working hours and locations.
  - Holiday virtual bank and even a holiday voucher!
  - Our people are encouraged to travel and visit other Squads or to work side-by-side with our clients in different locations, with expenses fully provided by us!
  - Provided free meals, fruits & drinks all the time in our office including a game room for relaxation and re-charging!
  - Team-building activities and regular fun and exciting events and community meetings!
